

STEFINOX

For cold sterile filtration of beer

Skids for sterile filtration of beer

- Standardised skids for easy installation
- Prefiltration – sterile filtration – media filtration all on one skid
- Maximum safety and cartridge lifetime
- Stand-alone skid or for integration

Technical data – capacity range for the skids

	Min flowrate skid in hl/h beer	Max flowrate skid in hl/h beer
STEFINOX 1	0	70
STEFINOX 2	70	200
STEFINOX 3	200	250
STEFINOX 4	250	500

- Wide variety of cartridges for prefiltration, sterile filtration and water filtration.
- Membrane cartridges can be integrity tested for a maximum safety.

- Installation at end of filter cellar or prior to filling.
- Modular design, flowrates from 0–500 hl/h of beer.
- Higher flow rates or special setups on request.

Application

Cold sterile filtration before the filler is an alternative to flash pasteurizing. The Bucher Unipektin skid allows a flexible and easy-to-integrate solution for small to medium size breweries (flowrates from 0–500 hl/h). This safe solution for a reliable product shelf life uses standard cartridges, and an integrity test of these membrane cartridges can be performed before each run.

Let's be clear!

Bucher Unipektin, Competence Center Filtration, is the world leading manufacturer of complete filtration solutions for the beverage industries. Our outstanding candle and horizontal leaf filters for the pre-coat filtration with kieselguhr and PVPP are the benchmark for the filtration of beer, sugar syrup, tea, gelatine and other liquid foods. We also develop and manufacture beer-recovery systems with ceramic membranes, crossflow membrane systems for beer main stream filtration, sterile filter systems with membrane cartridges and vacuum-distillation plants for de-alcoholisation.

Bucher Unipektin, Competence Center Filtration, is a business partner with a long-term industrial focus, committed to fair partnership with our customers, employees, and business associates.
