

Trade Press Release

Nuremberg, 12.11.2018

Sales cooperation between Bucher Unipektin AG and Denwel spol. s r.o.

The Competence Center Filtration of Bucher Unipektin, based in St. Gallen, Switzerland and Denwel, based in Prague, Czech Republic, decided to expand their already in some countries existing sales cooperation of brewery equipment into a worldwide cooperation. The portfolio and services of both, Denwel and Bucher Unipektin complement each other in an ideal way and will allow complete offerings in the cold process area of breweries.

The Competence Center Filtration of Bucher Unipektin AG is the world leading manufacturer of microfiltration and turn-key filtration systems for the beverage and beer industries. Apart from the well-known candle filter for pre-coat filtration with Kieselgur and PVPP, Bucher Unipektin develops and manufactures also membrane filter systems for the beer and beverage industry. Bucher Unipektin is globally present. Own sales and service companies offer competent and fastest support worldwide.

DENWEL spol. s r.o designs, manufactures and installs a wide range of specialized equipment dedicated to help customers optimizing their brewing processes. In combining experience and innovation with high quality components DENWEL supplies brewing equipment such as Water Deaeration, Blending, Carbonation and Nitrogenation, CIP and Flash Pasteurization systems. The company integrates the equipment into highly efficient and reliable engineering solutions including technological design, process automation, installation and commissioning being supported by a comprehensive after sales service.
